2007

Hanyang BioMedical International Symposium

"Update in Chest Diseases"

■ Date : June 22(Fri), 2007

■ Venue: Hanyang University,
Paiknam Library & Academic Information Center,
Seoul, Korea

Organized by Hanyang University College of Medicine

Supported by Hanyang University Medical Center,
Institute of BioMedical Science, Hanyang University

Invitation

Dear Colleagues,

It is my great pleasure to extend you this invitation to attend the **"Hanyang BioMedical International Symposium 2007 on Update in Chest Diseases,"** on behalf of Hanyang University College of Medicine. This institution began with a great mission of "Practice of love to all the people," and represented a leap forward for medical science and education. The Hanyang University College of Medicine and Medical Center are co-sponsoring this symposium.

There is a rapidly increasing number of people suffering from "Allergy and/or Respiratory Diseases" in Korea. Changing patterns of practice and vast increases in knowledge are creating a new world of medicine for practitioners, investigators and patients. The content areas of the program include hot topics within the field of allergy and respiratory diseases which impacts the study or practice of specialties. We pledge to fulfill our promise to provide you with premier practicing and research experiences of the outstanding speakers at home and abroad.

At the first ever such meeting on 'Update in Chest Diseases' in Korea the range of the symposium is broad to provide continuing education for medical scholars and I am anticipating mine with genuine excitement. I would like to ask you to make maximum use of the day for exchanging cut-edge views with your specialists.

We look forward to seeing you and can assure you of very enjoyable hours.

Ha-Baik Lee, MD, PhD
Dean
Hanyang University College of Medicine
